

How to choose the correct charger for your Lithium-Ion battery

1. Precisely identify the model number of the lithium-ion battery for your camera.
2. Search for the model number of the lithium-ion battery found on the Quick Charger fitting chart.
3. Once you found the model number of your lithium-ion battery on the fitting chart, immediately look out for the charger model number (charger model number starts with SVP-XXX) found on the right side of the lithium-ion battery model number.
